

Mortgage Market Comment – Benefits from any QE3 MBS purchases should be small

MBS Strategy

The FOMC decision last month to reinvest MBS paydowns into MBS was a surprise to the market. Now, some members appear to be preparing the groundwork for potential MBS purchases if the economy weakens¹.

Expectations for sharp MBS outperformance on the heels of this news appear premature. The potential for additional MBS purchases by the Fed remain some distance away, in our view.

Benefits of any such program to the housing market and the broader economy are likely to be modest. At the margin, lower mortgage rates could increase investor purchases by improving potential returns.

Rather than a broad-based MBS purchase program, any Fed buying could be more suited to absorbing large scale supply from a high volume government refi program, which we view as a highly challenging and economically questionable goal (*Mortgage Market Focus*, 14 July 2011). A TALF-like program to spur institutional investor purchases of GSE-owned foreclosed properties (REO) could deliver a stronger marginal impact, in our view (*ABS & RMBS Credit Strategy*, 12 August 2011).

If the Fed were to embark on a QE3 program, we believe that MBS purchases would almost certainly be a part of it, in order to allow the Fed to target mortgage rates directly and minimize the risk of a liquidity disruption in Treasuries if the entire operation were conducted in that sector.

For now, two important hurdles remain: (1) the Fed needs to conclude that QE3 is necessary, and (2) the potential dislocations to the MBS market from large scale Fed purchases need to be considered.

To overcome the first obstacle, there needs to be meaningful additional weakness in economic conditions. It seems to us that muddling along may not meet that threshold.

The second issue is more challenging than it appears at first blush. The Fed currently owns roughly 15% of all Agency MBS, and just over 20% of fixed-rate conventional pass-throughs. If the Fed were to buy \$500B of MBS as part of QE3, the numbers would jump to 25% and 34%, respectively. Fails problems, which dogged QE1, could be a significantly larger challenge under QE3. With the fails charge that is scheduled to take effect in February 2012, the risk of negatively affecting MBS liquidity is high in a QE3 scenario. The bulk of supply to the Fed will likely come from money managers, similar to QE1.

¹ http://online.wsj.com/article/SB10001424052970203752604576643510352250474.html?mod=Wsj_hp_LEFTWhatsNewsCollection

Direct benefits of yet another MBS purchase program appear to be modest, in our view. Mortgage rates are already at record lows, so the prospects of large scale incremental benefits generated by even lower rates are questionable. Moreover, the Fed's securities purchases would not fully translate into lower mortgage rates since originator capacity constraints will likely remain. There should nevertheless be a fair amount of incremental refinancing activity, mostly benefiting the strongest borrowers and resulting in minimal changes to broader economic metrics.

Mortgage rates could drop to a 3.00% to 3.50% range under a \$1T QE3 scenario evenly split between Treasuries and MBS. This could trigger an additional \$400B-500B in paydowns over 12 months, resulting in roughly \$4B-5B in incremental annual savings.

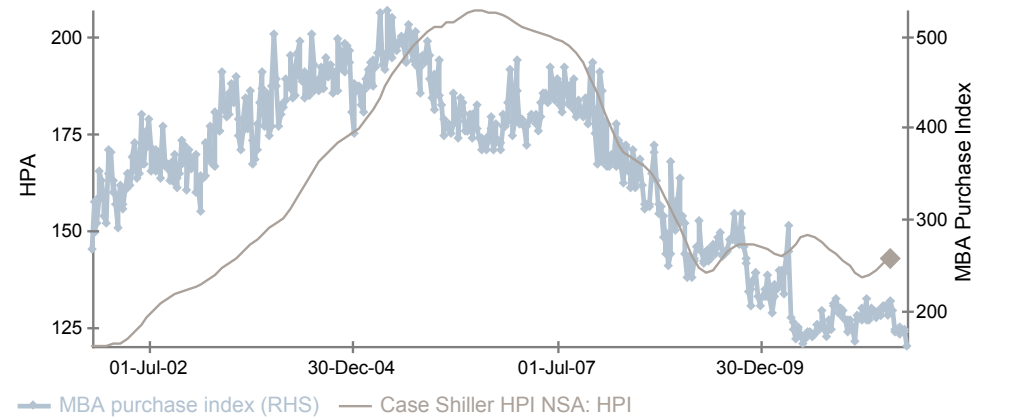

Prospects for an increase in home purchases due to lower mortgage rates remain muted. We note the historically weak relationship between mortgage yields and home purchases, and the perversely inverse correlation (not causation) more recently (Exhibit 1). Although affordability remains at a historical high, buyers remain on the sidelines largely due to concerns about potential further home price declines and/or the unfavorable employment outlook (Exhibit 2). At the margin, investor purchases could increase modestly due to higher carry as a result of lower rates.

Emerging Markets Bond Recommendation Definitions

Buy: Indicates a recommended buy on our expectation that the issue will deliver a return higher than the risk-free rate.

Sell: Indicates a recommended sell on our expectation that the issue will deliver a return lower than the risk-free rate.

Corporate Bond Fundamental Recommendation Definitions

Buy: Indicates a recommended buy on our expectation that the issue will be a top performer in its sector.

Outperform: Indicates an above-average total return performer within its sector. Bonds in this category have stable or improving credit profiles and are undervalued, or they may be weaker credits that, we believe, are cheap relative to the sector and are expected to outperform on a total-return basis. These bonds may possess price risk in a volatile environment.

Market Perform: Indicates a bond that is expected to return average performance in its sector.

Underperform: Indicates a below-average total-return performer within its sector. Bonds in this category have weak or worsening credit trends, or they may be stable credits that, we believe, are overvalued or rich relative to the sector.

Sell: Indicates a recommended sell on the expectation that the issue will be among the poor performers in its sector.

Restricted: In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Not Rated: Credit Suisse Global Credit Research or Global Leveraged Finance Research covers the issuer but currently does not offer an investment view on the subject issue.

Not Covered: Neither Credit Suisse Global Credit Research nor Global Leveraged Finance Research covers the issuer or offers an investment view on the issuer or any securities related to it. Any communication from Research on securities or companies that Credit Suisse does not cover is factual or a reasonable, non-material deduction based on an analysis of publicly available information.

Corporate Bond Risk Category Definitions

In addition to the recommendation, each issue may have a risk category indicating that it is an appropriate holding for an "average" high yield investor, designated as **Market**, or that it has a higher or lower risk profile, designated as **Speculative** and **Conservative**, respectively.

Credit Suisse Credit Rating Definitions

Credit Suisse may assign rating opinions to investment-grade and crossover issuers. Ratings are based on our assessment of a company's creditworthiness and are not recommendations to buy or sell a security. The ratings scale (AAA, AA, A, BBB, BB, B) is dependent on our assessment of an issuer's ability to meet its financial commitments in a timely manner. Within each category, creditworthiness is further detailed with a scale of High, Mid, or Low – with High being the strongest sub-category rating: **High AAA, Mid AAA, Low AAA** – obligor's capacity to meet its financial commitments is extremely strong; **High AA, Mid AA, Low AA** – obligor's capacity to meet its financial commitments is very strong; **High A, Mid A, Low A** – obligor's capacity to meet its financial commitments is strong; **High BBB, Mid BBB, Low BBB** – obligor's capacity to meet its financial commitments is adequate, but adverse economic/operating/financial circumstances are more likely to lead to a weakened capacity to meet its obligations; **High BB, Mid BB, Low BB** – obligations have speculative characteristics and are subject to substantial credit risk; **High B, Mid B, Low B** – obligor's capacity to meet its financial commitments is very weak and highly vulnerable to adverse economic, operating, and financial circumstances; **High CCC, Mid CCC, Low CCC** – obligor's capacity to meet its financial commitments is extremely weak and is dependent on favorable economic, operating, and financial circumstances. Credit Suisse's rating opinions do not necessarily correlate with those of the rating agencies.

The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you. CS does not advise on the tax consequences of investments and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS may, to the extent permitted by law, participate or invest in financing transactions with the issuer(s) of the securities referred to in this report, perform services for or solicit business from such issuers, and/or have a position or holding, or other material interest, or effect transactions, in such securities or options thereon, or other investments related thereto. In addition, it may make markets in the securities mentioned in the material presented in this report. CS may have, within the last three years, served as manager or co-manager of a public offering of securities for, or currently may make a primary market in issues of, any or all of the entities mentioned in this report or may be providing, or have provided within the previous 12 months, significant advice or investment services in relation to the investment concerned or a related investment. Additional information is, subject to duties of confidentiality, available on request. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance.

Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.
